**Long Distance Services**

Unlimited Long Distance  
to domestic U.S.

If the average monthly long distance usage exceeds 3000 minutes for 3 consecutive months, the Customer will automatically transition to a base rate of \$65.95 per month. If the average long distance usage exceeds 5000 minutes for 3 consecutive months, the Customer will automatically transition to a base rate of \$99.95 per month.

Customers will be transitioned to the applicable base rate without notice. The base rate change will be made effective with the Customer's next monthly invoice after NTS determines that the Customer's usage exceeds the maximum usage permitted under their current plan.

No less than ninety (90) days after the Customer has been transitioned to a higher base rate, the Customer may make a written request to be transitioned to a lower base rate. After receipt of the Customer's request, NTS will investigate to determine the applicable base rate based upon the average long distance usage for the previous three (3) consecutive months. If NTS determines that the Customer is eligible for transition to a lower base rate, NTS will make the rate change effective on the next monthly invoice after NTS makes the determination.
