

As of now, even small companies can have enterprise class Internet security.

Is your company a member of the "Fortune 5 Million"? If your organization has between 3 and 100 employees you are a member of this prestigious group. And as of now, you can have the same Internet security as members of the Fortune 500.

NTS Communications, your trusted Internet provider now offers enterprise class security for the smallest companies at unprecedented affordable prices. And as of now everything has changed!

What is enterprise class Internet security? It's the highest level peace of mind resulting from multi layered services monitored and managed on your network 24x7 by our NTS Communications Managed Secure Internet Department.

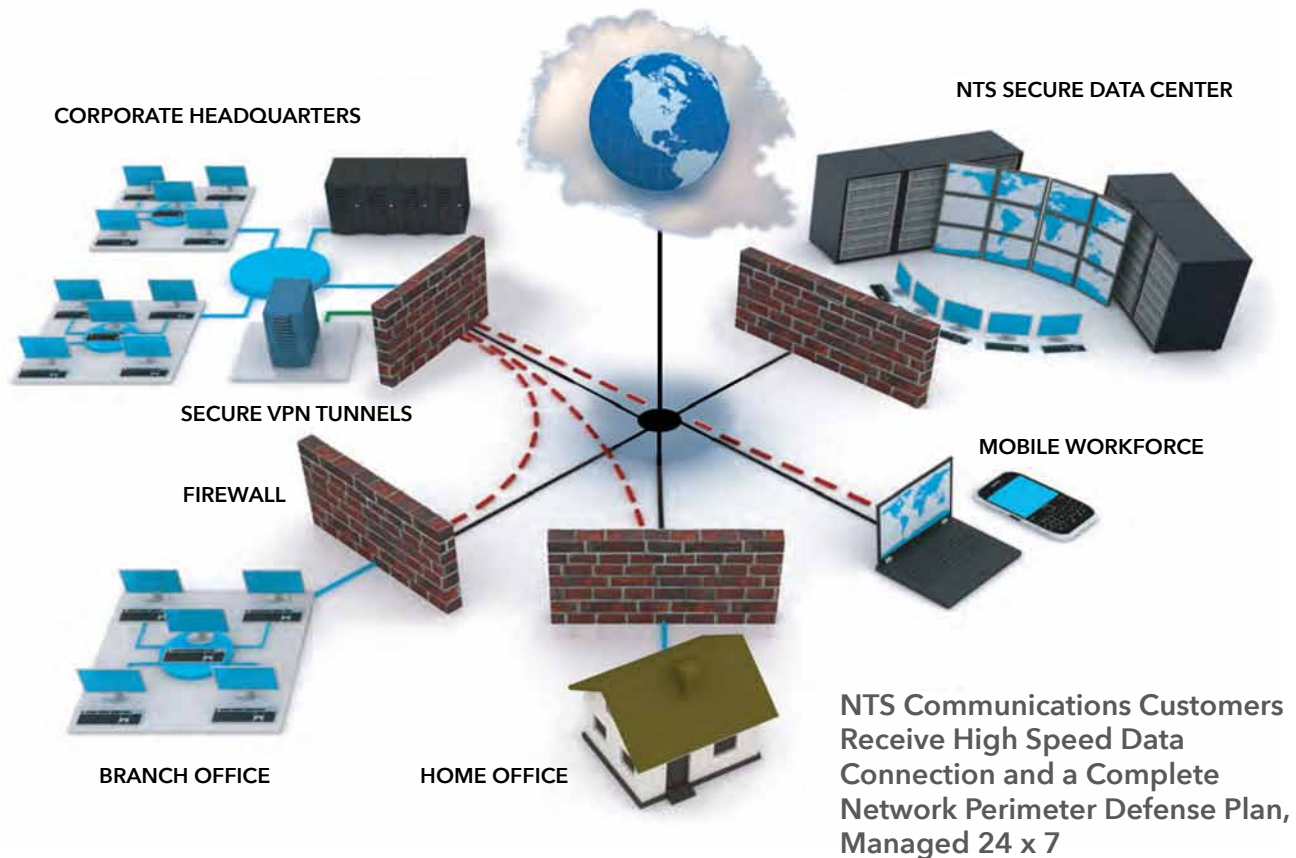

Managed Secure Internet from NTS Communications is a powerful state-of-the-art Dell Sonicwall firewall protecting your gateway and automatically updating software stopping attacks. It is secure Wi-Fi, anti-spyware, anti-virus, spam filtering, and content filtering blocking objectionable and unproductive websites. It is secure remote access VPNs and weekly security and productivity reports emailed to you. And NTS Internet security is unlimited customer service and consulting. You can call us any time. It is the highest value bundle of Internet security services in the industry.

Call us today and we will secure your future tomorrow just like the largest enterprises in the country.

Exclusive Secure Internet Solution:

High Speed Data Connections Bundled With Enterprise Class Security.

Managed Secure Internet
