When a rate as set forth in this tariff is shown to more than two decimal places, the charges will be determined using the rate shown. The resulting amount will then be rounded to the nearest penny (i.e., rounded to two decimal places).

**3.2 Manner of Provision**

Switched access is furnished in either quantities of lines or trunks. FGA Access is furnished on a per-line basis. FGD is furnished on a per-trunk basis.

At the Company's sole discretion, trunks may be differentiated by type and directionality of traffic carried over a Switched Access Service arrangement.

There are three major traffic types. These are: Originating, Terminating and Directory Assistance. Originating traffic type represents access capacity within a LATA for carrying traffic from the end user to the Customer; Terminating traffic type represents access capacity within a LATA for carrying traffic from the Customer to the end user; and, Directory Assistance traffic type represents access capacity within an exchange for carrying Directory Assistance traffic from the customer to a Directory Assistance location. When ordering capacity for FGD Access, the customer must at a minimum specify such access capacity in terms of Originating traffic type and/or Terminating traffic type.

**SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)****3.4 Access Ordering**

This section sets forth the regulations for Access Service Requests (ASR) for Switched Access Service, as defined in this tariff.

All services offered under this tariff will be ordered using an ASR. The format and terms of the ASR will be as specified in the industry Access Service Order Guidelines, unless otherwise specified herein. A Customer may order any number of services of the same type and between the same premises on a single ASR. All details for services for a particular order must be identical.

The Customer shall provide all information necessary for the Company to provide and bill for the requested service. When placing an order for Access Service, the Customer shall provide the following minimum information:

- Customer name and Premises address(es);
- Billing name and address (when different from Customer name and address); and
- Customer contact name(s) and telephone number(s) for the following provisioning activities: order negotiation, order confirmation, interactive design, installation and billing.

**3.4.1 Access Service Date Intervals**

Access Service is provided with one of the following Service Date intervals:

- Standard Interval
- Negotiated Interval

The Company will specify a FOC and the Service Commencement Date contingent on the ASR being complete as received. To the extent the Access Service can be made available with reasonable effort, the Company will provide the Access Service in accordance with the Customer's requested interval, subject to the following conditions:

**A. Standard Interval**

The Standard Interval for Switched Service will be 10 business days from the Application Date. This interval only applies to standard service offerings where there are pre-existing facilities to the Customer Premises. Access Services provided under the Standard Interval will be installed during Company business hours.

**ACCESS SERVICE**

---

**SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)****3.4 Access Ordering (Cont'd.)****3.4.1 Access Service Date Intervals (Cont' d.)****B. Negotiated Interval**

The Company will negotiate a Service Date interval with the Customer when:

1. The Customer requests a Service Date before or beyond the applicable Standard Interval Service Date; or
2. There is no existing facility connecting the Customer Premises with the Company; or
3. The Customer requests a service that is not considered by the Company to be a standard service offering (for example, if Additional Engineering is required to complete the order); or
4. The Company determines that Access Service cannot be installed within the Standard Interval.

The Company will offer a Service Date based on the type and quantity of Access Services the Customer has requested. The Negotiated Interval may not exceed by more than six months the Standard Interval Service Date, or, when there is no Standard Interval, the Company offered Service Date.

All services for which rates are applied on an Individual Case Basis are provided with a Negotiated Interval.

**3.4.2 Access Service Request Modifications**

The Customer may request a modification of its ASR prior to the Service Commencement Date. All modifications must be in writing using the industry ASR process. The Company, in its sole discretion, may accept a verbal modification from the Customer. The Company will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours.

**SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)****3.5 Special Construction**

General - Subject to the agreement of the Company and to all of the regulations contained in this tariff, special construction of Company Facilities may be undertaken by the Company on a reasonable-efforts basis at the request of the Customer. Special construction is that construction undertaken:

- g. involving abnormal costs; or
- h. in advance of its normal construction; or
- i. when the Company furnishes a facility or service for which a rate or charge is not specified in the Company's tariff.

Customer Acceptance - Rates and charges for special construction shall be determined and presented to the Customer for its approval prior to the start of construction. No construction will commence until and unless the Customer accepts in writing the rates and charges as presented by the Company.

Basis of Rates and Charges - Rates and charges shall be based on the costs incurred by the Company and may include any one or any combination of the following:

- a. Nonrecurring Charges;
- b. Recurring Monthly Rates; and/or

**SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)****3.6 Obligations of the Company**

The Company has certain obligations pertaining only to the provision of Switched Access Service. These obligations are as follows:

**3.6.1 Network Management**

The Company will utilize its best efforts to administer its network to ensure that provision of acceptable service levels to all telecommunications users of the Company's network services. Generally, service levels are considered acceptable only when both end users and Customers are able to establish connections with little or no delay encountered within the Company network. The Company maintains the right to apply protective controls, i.e., those actions, such as call gapping, which selectively cancel the completion of traffic, over any traffic carried over its network, including that associated with a Customer's Switched Access Service. Generally, such protective measures would only be taken as a result of occurrences such as a failure or overload of Company or Customer facilities, natural disasters, mass calling or national security demands.

**3.6.2 Design and Traffic Routing of Switched Access Service**

The Company shall design and determine the routing of Switched Access Service, including the selection of the first point of switching and the selection of facilities from the interface to any switching point and to the end offices where busy hour trunks are ordered. The Company shall also decide if capacity is to be provided by originating only, terminating only, or two-way trunk groups. Finally, the Company will decide whether trunk side access will be provided through the use of two-wire or four-wire trunk terminating equipment.

Selection of facilities and equipment and traffic routing of the service are based on standard engineering methods, available facilities and equipment and the Company's traffic routing plans.

If the Customer desires different routing or directionality than that determined by the Company, the Company will work cooperatively with the Customer in determining (1) whether the service is to be routed directly to an end office or through an access tandem switch and (2) the directionality of the service.

---

**ACCESS SERVICE**

---

**SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)****3.6 Obligations of the Company (Cont'd.)****3.6.3 Provision of Service Performance Data**

Subject to availability, end-to-end service performance data available to the Company through its own service evaluation routines, may also be made available to the Customer based on previously arranged intervals and format. This data provides information on overall end-to-end call completion and non-completion performance e.g., Customer equipment blockage, failure results and transmission performance. This data does not include service performance data which is provided under other tariff sections, e.g., testing service results. If the data is to be provided in other than paper format, the charges for such exchange will be determined on an individual case basis.

**3.6.4 Trunk Group Measurements Reports**

Subject to availability, the Company will make available trunk group data in the form of usage in CCS, peg count and overflow to the Customer based on previously agreed to intervals.

**3.7 Obligations of the Customer**

The Customer has certain specific obligations pertaining to the use of Switched Access Service. These obligations are as follows:

**3.7.1 Report Requirements**

Customers are responsible for providing the following reports to the Company, when applicable.

- A. Saved For Future Use**
- B. Code Screening Reports**

When a Customer orders service call routing, trunk access limitation or call gapping arrangements, the customer must report the number of trunks and/or the appropriate codes to be instituted in each end office or access tandem switch, for each of the arrangements ordered.

The Company will administer its network in such a manner that the impact of traffic surges due to peaked 900 Access Service traffic on other access service traffic is minimized. Network management controls may be implemented at the Company option to ensure acceptable service levels.

**ACCESS SERVICE**

---

**SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)****3.7 Obligations of the Customer (Cont' d.)****3.7.2 On and Off-Hook Supervision**

The Customer's facilities shall provide the necessary on and off-hook supervision for accurate timing of calls.

**3.8 Rate Regulations**

This section contains the specific regulations governing the rates and charges that apply for Switched Access Service.

Usage-based Access Charges are applied on a per access minute basis. Such access minute charges are accumulated over a monthly period.

**3.8.1 Nonrecurring Charges**

Nonrecurring charges are one-time charges that apply for a specific work activity (e.g., installation or change to an existing service).

**3.8.2 Minimum Periods**

Switched Access Service is provided for a minimum period of one month.

**3.8.3 Moves**

A move of services involves a change in the physical location of one of the following:

- The point of termination at the Customer's premises
- The Customer's premises

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building as described below.

---

**ACCESS SERVICE**

---

**SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)****3.8 Rate Regulations (Cont'd.)****3.8.3 Moves (Cont'd)****A. Moves Within the Same Building**

When the move is to a new location within the same building, the charge for the move will be an amount equal to one half of the nonrecurring charge for the capacity affected. There will be no change in the minimum period requirements.

**B. Moves to a Different Building**

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new service. The Customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

**3.8.4 Installation of Optional Features**

If a separate nonrecurring charge applies for the installation of an optional feature available with Switched Access Service, the charge applies whether the feature is installed coincident with the initial installation of service or at any time subsequent to the initial installation of service.

The charges associated with upgrades in capacity will not apply when the customer maintains the same customer premises location.

For all other changes, including the addition of, or modifications to, optional features without separate nonrecurring charges, a charge equal to one half the Switched Transport nonrecurring (i.e. installation) charge will apply. When an optional feature is not required on each transmission path, but rather for an entire transmission path group, an end office or an access tandem switch, only one such charge will apply.

**ACCESS SERVICE**

---

**SECTION 3 - SWITCHED ACCESS SERVICE (CONT'D.)**

**3.8 Rate Regulations (Cont'd.)**

**3.8.5 Service Rearrangements**

Service rearrangements are changes to existing services installed which do not result in either a change in the minimum period requirements or a change in the physical location of the point of termination at the Customer's premises or the Customer's end user's premises. Changes which result in the establishment of new minimum period obligations are treated as disconnects and starts.

The charge to the Customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves an actual physical change to the service.

Administrative changes will be made without charge(s) to the Customer. Such changes require the continued provision and billing of the Access Service to the same entity or change in jurisdiction.

**SECTION 4 - DEDICATED TRANSPORT****4.1 General**

The Company provides intrastate Dedicated Transport Service with transmission speeds ranging from 2.4 Kbps to 2.4 Gbps. All services are generally available from all NTS cities specified herein. Dedicated transport services are offered on a point-to-point basis. Each Dedicated Transport Service is dedicated to the Customer and the entire usable bandwidth for each service is available to the Customer for their exclusive use.

Standard pricing is available for all non-custom services. Standard rates are provided in Section 4.4 following. The tariffed rates contained in this section are applied based on the locality of service, type of service and the term plan selected.

**4.1.1 Two Point Service**

Two Point Service allows two Customer-designated locations to be connected by one Dedicated Transport Service. The service terminated at both locations must be the same speed and the same capacity.

**4.1.2 On-Net v. Off-Net**

On-Net Services are those which connect two locations which are both directly served by the Company's network. Pricing and regulations pertaining to On-Net services are described in this tariff.

Off-Net Services are those where one or more location to be connected is not served directly by the Company's network. Off-Net Service must be provisioned, in part, by another local access provider. In the instances where the Company is able to provide Off-Net Services, the performance parameters and pricing of the Off-Net services will be passed through to the Customer at cost plus 25% mark-up to cover the Company's cost to arrange, monitor, and maintain such Off-Net service.

All rates included in Section 4.4 are for On-Net arrangements. Off-net service charges will be developed on an Individual Case Basis.

The Channel Termination rate category provides for the communications path between a customer designated premises and the serving wire center of that premises.

**B. Channel Mileage**

The Channel Mileage rate category provides for the end office equipment and transmission channel between the serving wire center associated with the two customer premises.

**C. Optional Features and Functions**

Optional Features and Functions may be added to a special access service to improve its quality or utility to meet the customer's specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics which may be obtained.
